

TRIPLE TESTED

DOSAGE:

One cc daily is recommended for the treatment of B vitamin deficiencies. If indicated, larger doses may be given in acute cases. To relieve mild deficiencies, 1 cc two or three times a week should prove clinically satisfactory.

FORMULA:

Each 1 cc contains
 Thiamin Chloride (B₁), 100 mg.
 Riboflavin (B₂) 2 mg.
 Niacinamide 100 mg.
 Calcium Pantothenate, 10 mg.
 Pyridoxine (B₆) 5 mg.
 Choline 20 mg.
 Inositol 10 mg.
 (Benzyl Alcohol 2%,
 Chlorobutanol 0.5%
 as a preservative.)

Stayner B Complex (Injectable) is a well balanced high-potency therapeutic vitamin formula for convenient administration, either intravenously or intramuscularly.

Choline and Inositol are included in the formula to provide all known B complex factors. The addition of 2% Benzyl Alcohol, a mild local anesthetic, allows intramuscular administration with minimum discomfort to the patient.

To insure safety, this preparation is tested three ways: *chemically* for potency, *physiologically* for lack of toxicity, and *biologically* for lack of contamination.

Ask your druggist for Stayner B Complex Vitamins (Injectable) Formula No. 309. It is supplied in 15 cc rubber-diaphragm vials, providing flexibility of dosage with maximum protection and economy.
